# QUAZAR3D™

## 01 ABOUT QUAZAR3D

Quazar3D is a platform for creating real time interactive applications with a stereoscopic effect. It is an open graphal environment that can be developed depending on the client's needs or a specific project, thus giving the possibility of effective communication.

## 02 QUAZAR3D USERS

Quazar3D is an environment that enables creation of interactive application by professionals (programmers, graphic designers, engineers, designers, academic employees) as well as by users without programming experience (students, pupils).

## 03 QUAZAR3D APPLICATIONS

Quazar3D is an excellent tool that can be used in many fields like industry (trainings, simulators, and product presentations), education (lectures, exercises, laboratories), museums, project management offices (project verification, trainings), administration (decision centers, competence centers, data management, data visualization).
